

InflaRx is a NASDAQ listed biotechnology company with offices in Jena and Munich, Germany. We research and develop new medicines for the treatment of inflammatory diseases within a global development approach. We stand out for an excellent team of highly motivated and skilled individuals who put strong emphasis on a team effort.

To support our expanding CRD team we are looking for a

Director Clinical Research and Development (m/f/d)

The Director Clinical Research and Development will take a leadership role in the development of our compounds in autoimmune and inflammatory diseases. The position is located in Jena or Martinsried.

Primary Responsibilities:

- Create and execute global clinical development plans consistent with the Company's strategy
- Support interactions with Regulatory Agencies, including the preparation of regulatory documents and presenting at meetings with regulatory agencies
- Ensure the optimal planning, implementation and interpretation of clinical studies
- Specifically analyzing potential issues and risks that affect the project, particular those that affect the quality and integrity of the data and the safety of the drugs
- Maintain and build productive relationships with investigators, thought leaders and centers of excellence across the scientific community, as well as with colleagues across the organization
- Communicate appropriate program issues and results to key internal and external stakeholders
- Develop a strong knowledge base of the relevant therapeutic area and drug development issues and become a company expert for the respective treatment to ensure that study concepts, protocol summaries and final protocols related to the relevant development plans are high quality, state of the art and aligned with related Clinical Development Plans and Target Product Profiles
- Comply with current local and international regulations, laws, scientific and regulatory guidance, Good Clinical Practice, and internal policies and procedures

Education/Experience/Skills:

- M.D. or Ph.D.
- Minimum of 10 years' experience in the biotech, pharma or CRO industry
- Knowledge of all aspects of the clinical drug development process, including experience in successfully creating and implementing development plans for drugs
- Experience in preparation of regulatory submission documents
- Experience with monoclonal antibodies is preferred
- Ability to engage in an open, constructive and continuous dialogue
- Effective communication and presentation skill
- Fluent in written and verbal business English
- Highly motivated, self-driven and dependable
- Ability to travel (domestic and international travel is required)
